Comment Text :

1 [--->The Government should have used the money wasted on the Yucca Mountain project to find a way to reclaim the waste. I do not want nuclear waste moved past my neighborhood and stored in a facility that will not give me 100% assurance that nuclear waste will not leak into the ground water or in other ways contaminate the enviroment.

1       The track record of testing nuclear explosives without contaminating whole islands or  
continued areas and not harming the people downwind from the test is poor. We as citizens do  
not want to be the next government casualties.
